

HCM DATA IN, ACTIONABLE ANALYTICS OUT.

Most Human Capital Management environments are a tangled web of multiple systems where disconnected data silos prevent seeing the big picture. The volume and complexity of people data increases as applications and business demands grow. 3DR Cube is a data archiving, reporting, analytics, and data visualization SaaS platform designed to unify hybrid human capital and ERP data environments and transform it — turning raw data into smart data.

3DR Cube has been designed by our Data Science team to capture the information you need and provide compelling and interactive dashboards to get true insights from your Human Capital Management systems.

Our Data Science as a Service team (DSaaS) combines deep HR domain and data science expertise to move beyond module reporting to an organizational understanding by combining multiple aspects of your business together.

Targeted Impact Modules provide out of the box KPIs and metrics to simplify reporting across all your HCM solutions.

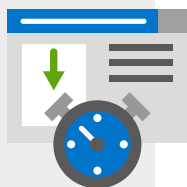

Archive historic data while drastically reducing the time you need to get up and running on SAP® SuccessFactors® Employee Central.

Key features of the Cube

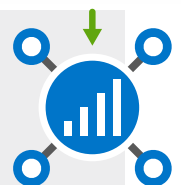

3DR Cube is designed to easily integrate with the SAP SuccessFactors HCM Suite but is data source agnostic and can bring all of your information together, regardless of source system.

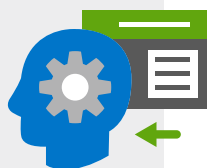

- Snapshot “point in time” data capture
- Real time data refresh
- Rapid deployment, with pre-built, ready to use reports and dashboards

- Predictive analytics
- Dynamic statistical discovery

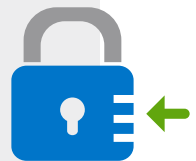

- Join data from multiple SAP SuccessFactors modules, other HCM systems, and integrate data from outside sources
- Handle large amounts of data quickly and reliably

- Responsive design for mobile devices
- Launch from SAP SuccessFactors home page

- SOC2 and GDPR compliant
- Enterprise scalability

Available on the
SAP App Center
